ACHIEVEMENTS

Women Engineers

March 2020

Out of around 15k applicants I was one of the 126 girls selected for the WE program after many tough selection rounds

HackinUTU

October 2020

Our team was selected in the top 25 finalists among 450+ participating teams in a national level hackathon. In a team of four, we had build a user-friendly mobile application for various skin problems and skincare.

Unscript Rookies

November 2020

Our team was declared the winner in Unscript Rookies hackathon. We had build mobile application for canteen management system.

DSC WOW

December 2020

Our team was among the top 20 finalists of the national level hackathon with over 300+ participating teams. We took our canteen management idea to a new level.

EXPERIENCE

Microsoft Learn Student Ambassadors

I have been selects as a MLSA by Microsoft which provides opportunities to learn and grow with community.

Girlsript Summer Of Code

I have been selected for girlsript summer of code 2021 as a participant. It is a 3 month long program for open source contribution.

Developer Student Club

I have been selected as a junior associate at Developer Student Club, DDU branch under mobile development team, where we build mobile applications useful for the community.

Computer Society Of India

I have been selected as a junior associate at Computer Society of India DDU branch. CSI is a club where all the members learn together and organize various events and seminars

PROJECTS

CANTEEN MANAGEMENT

November 2020

This is a group project build as a part of a hackathon which is a flutter based application to order food online and all the changes are reflected in the admin application. Both these apps are connected via a single firebase project.

SKINSHINE

October 2020

This is a group project build as a part of a hackathon which is a flutter based application to detect skin diseases based on image and it also includes various features like login, signup, news, water reminder, chatbot etc.

NOTES

September 2020

It is a simple flutter based notes application that simply creates, updates and deletes notes implemented using simple dart storage classes and currently lacks a permanent database.

SMART ASSISSTANT

September 2020

It is a pure python based application that calculates simple mathematical problems on user input in form of normal english sentences.

DIALECTOR

July 2020

It is a voice-to-voice language translator app built using flutter tool. It also includes features like chat, Image OCR etc.

CO-CURRICULAR

- Stood first in inter-school painting competition
- Held position of responsibility in school prefectorial board
- Winner of Reliance Drishti Essay writing competition
- Selected for state level Rural IT Quiz
